

Deinking and Bleaching Pulp Mill

Capacity 150 TPD

Year Started 1992

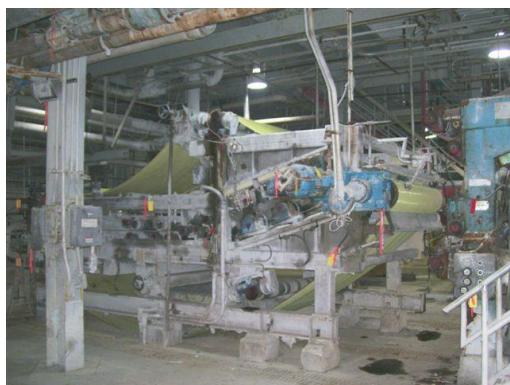

Year Upgraded 1995

Feedstock Recycled newspaper and magazines or other waste paper.

Product Wet-lap pulp for paper and tissues

Major Equipment

- Bleaching tower
- Deinking blower
- Fiber flow drum pulper
- Deflaker pump
- Pressure screens
- Filter press
- Conveyors
- Heat exchangers
- Belt press
- Steam mixer
- MDR mixer

BRIEF PLANT DESCRIPTION

Using newspaper and magazines or other waste paper, the plant is capable of producing 50% consistency wet-lap pulp for fine paper and tissue with up to 90-degree ISO brightness and 400+ freeness. Its bleaching process section uses hydrogen peroxide.
